What's in Installing and Configuring Windows Server 2012 (70-410):

The course provides skills and knowledge necessary to implement a core Windows Server 2012 infrastructure in an existing enterprise environment. After completing this course, students will be able to implement and configure Windows Server 2012 core services, such as Active Directory and the networking services.

Target Audience:

Individuals looking to take the Microsoft 70-410 examination as well as those aspiring to become server administrators and network specialists with the skills and knowledge necessary for implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server 2012 environment.

Prerequisites:

Intermediate computer skills and an understanding of network management and server administration.

Duration:

35 hours
